LAS VEGAS – The Las Vegas Convention and Visitors Authority (LVCVA) recently approved a contract retaining Smart City as exclusive telecommunications technology service provider to the Las Vegas Convention Center (LVCC) and Cashman Center.

“We’re pleased that the LVCVA has approved our contract, and feel very privileged to work with one of the best convention centers in the country,” said Paul Ashley, president of Smart City.

The decision to approve the contract was unanimous. This is the fourth contract extension that Smart City has received from the LVCVA since the company started providing services in 1998.

Effective June 1 through May 31, 2013, Smart City will continue to provide a number of services to the convention center, including telecommunications voice and data services, wired and wireless Internet services, Web-casting solutions, video conferencing, private network options and custom network security solutions.

“We’re looking forward to continuing our relationship with Smart City as our data and voice services provider,” said Mark Haley, vice president of facilities for the LVCVA. “We’ve worked hard to maintain our facilities as among the best in technology and customer service, and we’ll continue to work with our partners to provide an experience our customers expect in Las Vegas.”

About the LVCVA

The Las Vegas Convention and Visitors Authority markets Southern Nevada as a tourism and

convention destination worldwide and operates the Las Vegas Convention Center and Cashman Center. With more than 130,000 hotel rooms in Las Vegas alone and nine million square feet of meeting and exhibit space citywide, the LVCVA's mission centers on attracting ever-increasing numbers of leisure and business visitors to the area.

About Smart City

Founded in 1984, Smart City is the nation's largest provider of event technology in the convention industry. With corporate headquarters in Las Vegas and Lake Buena Vista, Fla., Smart City provides clients with design, installation and maintenance of data, voice, electrical and utility platforms and with voice, video and data network engineering, security and monitoring across the United States. Smart City provides services to more than 5,000 tradeshows at more than 60 U.S. convention centers.
